PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years shipping production systems across insurtech, fintech, and enterprise SaaS. At Afficiency, architected a schema-driven React and Flask platform serving 30,000+ agents and processing ~\$5M in annual premium, and co-built an agentic AI workflow with Claude Code that cut feature delivery time ~70%. Owns work from spec to production and cares about product outcomes as much as code quality.

CORE COMPETENCIES

React.js / Next.js

Node.js / Flask

TypeScript / JavaScript

Python

PostgreSQL / MongoDB

AWS / Azure / GCP

Agentic AI Workflows

REST APIs / GraphQL / FHIR

WORK EXPERIENCE

Afficiency Inc. - Senior Full Stack Engineer Sep 2023 - Present
New York, NY

- Co-built a team-wide agentic AI engineering workflow using Claude Code, driving spec-first development that cut feature delivery time ~70% with near-zero bug rates and full end-to-end Playwright coverage.
- Architected the core platform for 30,000+ agents across 6+ carriers: a schema-driven React framework enabling zero-code carrier onboarding, backed by Flask APIs with Redis caching that cut quoting response times 60%.
- Directed an agentic-AI-assisted migration of the production platform from AWS to Azure (MySQL/Redis to PostgreSQL/Valkey) in 3 days, restructuring the codebase into per-product repositories.
- Built Monitorly, an in-house session-replay and observability platform (recording SDK, event-ingestion pipeline, real-time alerting) that replaced LogRocket and cut tooling costs 40%.
- Shipped a fraud-detection and underwriting-verification system on a live \$5-8M premium platform (LexisNexis, GIACT, MVR, MIB, FHIR-based EHR integrations, PII dedup, velocity checks), keeping it at zero standing fraud cases.
- Built AffiHub, an internal support-ticketing platform with workflow automation, replacing the team's HubSpot subscription after direct discovery with the support team.
- Built "Application 360," an L2 diagnostic dashboard unifying application status, errors, and session data into one investigator view, and an AI-assisted PDF engine that uses Claude to turn insurance-form layouts into HTML templates and render production PDFs at scale.
- Automated CI/CD across GitLab, Docker, and Kubernetes and completed 2,000+ code reviews, improving release consistency 35%.

Systems Engineering Research Center (SERC) - Full Stack Developer Jul 2022 - Jun 2023
Hoboken, NJ

- Designed and launched Helix, a behavioral-research platform (React, Node.js, MySQL, AWS) for 20,000+ researchers, including a PHP-Laravel to React SPA migration that improved performance 40%.
- Built a secure REST API with RBAC/JWT auth and a reusable React component library that cut code duplication 50% and lifted feature velocity 25%.
- Deployed to AWS EC2 via Docker and GitHub Actions CI/CD, achieving sub-15-minute deployments and 99.9% uptime.

LTi (Larsen & Toubro Infotech) - Software Engineer Jan 2019 - Jul 2021
Navi Mumbai, India

- Built and scaled a MERN enterprise app on AWS for 50,000+ users, contributing real-time data sync, analytics dashboards, and 200+ REST endpoints.
- Cut API response times 10x (3s to 300ms) with Redis caching and optimized MongoDB aggregation, and helped migrate a Node.js monolith to microservices.

PROJECTS

JumpToCode - React Developer Chrome Extension React Fiber | Node.js | Express | VS Code CLI
Chrome DevTools extension that maps live React components to their exact source file and line via the Fiber tree, with one-click navigation into VS Code.

MultiPDF ChatBot AI Python | LangChain | Hugging Face | FAISS | Streamlit
AI chatbot for conversational search across multiple PDFs using LangChain, FAISS vector retrieval, and Instructor-XL embeddings.

TULSEE - Team Collaboration Platform React | Node.js | MongoDB | Socket.io | Firebase | Zoom API
Full-stack team workspace with real-time encrypted chat, task management, Google SSO, and Zoom scheduling integration.

EDUCATION

Master of Science in Computer Science - Stevens Institute of Technology Aug 2021 - May 2023
Hoboken, NJ | GPA: 3.84 | Provost's Master's Scholarship

Bachelor of Science in Computer Science - University of Mumbai May 2015 - Jun 2018
Mumbai, India | GPA: 3.5

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML/CSS
Frontend: React.js, Next.js, Vue.js, React Native, Redux, Zustand, React Query, Expo, Chakra UI
Backend: Node.js, Express, Flask, FastAPI, GraphQL, REST APIs, FHIR, Microservices, Socket.io
AI / LLMs: Claude Code, Claude APIs (Anthropic), LangChain, Hugging Face, RAG pipelines, FAISS, Prompt Engineering
Databases: PostgreSQL, MySQL, MongoDB, Redis, Valkey, SQLAlchemy, SQL Server
Cloud & DevOps: AWS (EC2, S3, CloudFront, Cognito, Lambda), Azure, GCP, Kubernetes, Docker, NGINX, Firebase, CI/CD
Tools & Practices: Git, GitLab, GitHub Actions, Playwright, Postman, New Relic, JIRA, Agile/Scrum, Figma
